ABOUT ME

Software Developer experienced in building full-stack web applications with React.js, Node.js, and MongoDB, plus automation workflows using n8n and external APIs. Comfortable across the stack from REST APIs and data modeling to responsive front-ends with a growing focus on AI-powered automation.

ACHIEVEMENTS

- 1st Prize, Catch2024 Hackathon. Developed an e-learning platform focused on personalized education paths for students.
- Team Leader, Smart India Hackathon. Led a team of 6 members through ideation, development, and presentation, and advanced to the qualification round with the project.

SKILLS

Frontend: HTML5, CSS3, React.js, Tailwind CSS.

Backend: Node.js, RESTful APIs.

Database: MySQL, MongoDB, Supabase.

Automation tools: n8n Workflows, MCP, Claude.

Tools: Git/GitHub, Postman

Programming Languages: Java, JavaScript

Soft Skills: Communication, Problem Solving, Adaptability

EXPERIENCE

Web Development intern | Pantech AI

Jun 2024 - Aug 2024

- Developed responsive web interfaces using HTML5, CSS3, and JavaScript.
- Optimized website performance and enhanced user experience for client projects.
- Applied prompt engineering techniques and collaborated on AI-assisted web development workflows

Full stack AI Developer | Freelance

Oct 2025 - Present

- Delivered production-ready web applications and custom software solutions for clients, integrating CRMs, APIs, and third-party services.
- Built AI-powered WhatsApp and Instagram agents and automated workflows for lead capture, qualification, follow-ups, and FAQs, enabling 24/7 lead response.
- Automated repetitive lead-management processes, reducing manual follow-up time by 90% while improving response speed and consistency.
- Developed and integrated voice agents and communication workflows to automate lead confirmations, scheduling, and follow-ups, helping reduce missed appointments and site-visit no-shows.
- Designed CRM-connected automation workflows for customer engagement, review collection, and post-service follow-ups, reducing manual intervention and keeping processes running automatically.
- Worked directly with client requirements to identify workflow bottlenecks and translate them into practical software, API integrations, and automation solutions.

PROJECTS

AI SEO Blog Automation | n8n, Open AI API, Google Sheets

- Built an end-to-end AI-powered SEO content pipeline (n8n, OpenAI API, WordPress REST API) that generates fully SEO-optimized blog posts including meta title, meta description, slug, and structured headers from just a target keyword and search intent
- Automated on-page SEO metadata generation, cutting content production time from hours to minutes while maintaining SEO best practices.

AI Voice Receptionist | Retell AI, Twilio, n8n, Webhooks, API Integration

- Built a 24/7 AI voice receptionist that answers inbound business calls, handles FAQs, and books appointments automatically.
- Integrated Voice AI (Retell AI) with n8n via webhooks to orchestrate real-time call handling, intent detection, and calendar booking logic.

Movie Dex | React.js, OMDb API, JavaScript, CSS, LocalStorage

- Built a React.js movie search platform using the OMDb API to fetch and display real-time movie data with minimal load times.
- Integrated REST APIs to dynamically load titles, ratings, posters, cast, and plot metadata as users search.
- Designed a responsive, component-based UI with reusable search, card, and detail view components. Handled API rate limits, empty states, and error handling gracefully to keep the experience smooth

Thrive personal Blog | Next.js, JavaScript, Tailwind CSS, Node.js, REST API.

- Built a full-stack blog platform on Next.js with a custom admin console (CMS), cloud-based media storage, and dynamic content rendering.
- Designed and implemented RESTful APIs connecting the Next.js frontend to a MongoDB backend for content, media, and publishing workflows.
- Built an SEO-optimized publishing pipeline structured metadata, clean URLs, and content formatting for search visibility and organic traffic growth.

EDUCATION

B.E. Computer Science and Engineering

2022-2026

Mahendra institute of engineering and technology, Nammakal.

Higher Secondary Education (HSC)

2020-2022

Sri Vinayaga Matric Hr Sec School, Kallakuruchi.

HOBBIES

- Experimenting & Playing with AI tools
- Going for a walk and workout
- Reading non-fiction books
- Spending time with my cat
